# TIGER KEY RING

Strong, powerful and instantly recognisable from its mighty roar and striking orange and black stripy coat – the tiger is the biggest of all the cat species. Tigers have been walking this planet for about 2 million years, however during the last century wild tiger numbers have fallen by over 95 per cent due to habitat loss, illegal wildlife trade and climate change. These majestic big cats are endangered, but with a helping hand we can protect them. WWF is working hard to help give tigers a future and you can too by becoming a tiger protector. Here's a fun way to celebrate tigers!

Use your tiger keyring with pride and as a talking point to inform people about tigers and some of the reasons that they are endangered. Tell them how they can become a tiger protector too!

40 minutes   all ages   indoor fun

What you need
- Beads
- Key ring loop
- Cotton / string
- Pens
- Recycled materials

What to do
1. Make a knot on the end of the cotton or string
2. Thread beads onto the string; why not choose alternate orange and black beads to make tiger stripes?
3. Decorate wooden beads with tiger stripes or Tx2

Top tips
Use recycled items to make alternative beads... you could cut shapes from an old plastic bottle, fold paper to make beads or cut small pieces of fabric into rolls to add to your keyring...

GET INVOLVED:

These majestic big cats need our help. Become a Tiger Protector today and help us double their numbers in the wild by 2020 – the next Chinese year of the tiger:
